DETAILED ACTION

Claims 1-36 are pending examination on the merits.

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

Claim 1, drawn to a polymer comprising repeating units (I) and (II) link Groups I-III.

Group I,

Claim(s) 1-3, 9, 10 and 18-36, drawn to a polymer comprising repeating units (I) and (II).

Group II,

Claim(s) 4-8, 11 and 12, drawn to a polymer comprising repeating units (I), (II) and (III).

Group III

Claim(s) 13-17, drawn to a composition comprising a polymer repeating groups (I) and (II) and a unctuous agent.

The inventions listed as Groups I-III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

Bowers et al. (US 6,225,431) discloses a polymer comprising repeating units (I) and (II) (Example 20-22) according to invention I and thus is not considered a special technical feature.

Group II differs from Groups I and III because additional unit (III) is included in the polymer. Group III differs from Groups I and II because an unctuous agent is added.

A telephone call was made to Monique Cole on November 06, 2008 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse. Traversal must be presented at the time of election in order to be considered timely. Failure to timely traverse the requirement will result in the loss of right to petition under 37 CFR 1.144. If claims are added after the election, applicant must indicate which of these claims are readable on the elected invention.

If claims are added after the election, applicant must indicate which of these claims are readable upon the elected invention.

Should applicant traverse on the ground that the inventions are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.
